

AVA JOHNSON

Software Engineer | Machine Learning | AI Enthusiast

+1-(234)-555-1234 @ Email linkedin.com GitHub

Philadelphia, Pennsylvania

SUMMARY

With over 10 years of experience, specializing in software engineering and machine learning, brings strong expertise in Python, TensorFlow, and cloud platforms. Excellent communicator and team collaborator, significantly improved data processes and systems. Known for leading projects that drive engagement and performance improvements, passionate about cutting-edge technological advancements.

EXPERIENCE

Software Engineer03/2023 - Present

TechSphere SolutionsPhiladelphia, PA

- Designed scalable algorithms improving data processing speed by 30% using TensorFlow, directly impacting user experience.
- Integrated machine learning models into cloud infrastructure reducing manual interventions by 25%, enhancing system reliability.
- Led a cross-functional team of 5 engineers and data scientists in optimizing the recommendation system, increasing engagement by 20%.
- Streamlined machine learning operations by developing automation scripts, decreasing model deployment time by 40%.
- Facilitated knowledge sharing sessions on the latest AI advancements boosting team expertise and innovation potential.

Machine Learning Engineer06/2019 - 02/2023

DataSync TechnologiesNewark, NJ

- Developed predictive models that enhanced forecasting accuracy by 18% through advanced data analysis techniques.
- Collaborated with product teams to deploy machine learning models resulting in a 25% improvement in product efficiency.
- Implemented Python-based frameworks reducing data processing latency by 35% company-wide, supporting technical scalability.
- Provided mentorship to junior engineers, enhancing their technical skills and increasing team productivity by 15%.

Software Developer08/2016 - 05/2019

CleverCode Inc.Baltimore, MD

- Architected software components using Java, improving system performance by 22% and reducing downtime substantially.
- Collaborated closely with clients ensuring system specifications align with business requirements, enhancing client satisfaction by 30%.
- Optimized existing algorithms, reducing computational costs by 18%, benefiting overall operational budgets.
- Contributed to code reviews, ensuring adherence to best practices and fostering a culture of continuous improvement.

EDUCATION

Bachelor of Science in Computer Science01/2013 - 01/2016

University of PennsylvaniaPhiladelphia, PA

PROJECTS

Open Source Text Analysis Tool

Developed a Python-based text analysis tool improving data extraction efficiency. Available at www.github.com/avajohnson/text-analysis

Image Classification API

Created an API for image classification utilizing deep learning techniques for enhanced recognition accuracy. Available at www.github.com/avajohnson/image-classifier

KEY ACHIEVEMENTS

- ✓ Improved Data Pipelines
- Enhanced data processing pipelines leading to a 25% reduction in delays, proving beneficial for high-volume operations.
- 💡 Recognized Mentor
- Acknowledged for mentoring several junior developers, contributing to a 15% success rate increase in projects.
- ☆ Published Work
- Co-authored a research paper on machine learning optimization, increasing visibility by 40% in academic circles.
