

OLIVER DAVIS

Cloud Engineer | Cloud Infrastructure | GCP

+1-(234)-555-1234 Email linkedin.com https://www.github.com San Diego, California

SUMMARY

With over 5 years of experience in cloud engineering, adept in deploying and managing GCP services while optimizing operations for efficiency. Proven track record in automating infrastructure with Terraform and collaborating effectively to enhance system performance. Driven by a passion for cloud technologies, constantly seeking to innovate and reduce operational costs.

PROJECTS

Cloud Optimization Toolkit

Developed a set of scripting tools for optimizing GCP resources, achieving 15% efficiency gain. GitHub: <https://www.github.com>

Secure VPC Configurator

Created a script to automate VPC security configurations, reducing configuration errors by 25%. GitHub: <https://www.github.com>

KEY ACHIEVEMENTS

- ☆

Saved Costs with Infrastructure Optimization

Achieved 30% cost savings through efficient resource scaling and automation on Google Cloud Platform.
- 🏆

Enhanced Deployment Pipelines with Automation

Reduced deployment time by 50% using automated Jenkins CI/CD pipelines in collaboration with development teams.

EXPERIENCE

Google Cloud Engineer

- ##### NextGen Cloud Services

01/2025 - Present Austin, Texas

 - Implemented and maintained cloud infrastructure on Google Cloud Platform, resulting in a 30% increase in system efficiency.
 - Led initiatives to automate cloud operations using Terraform, reducing manual workload by 40%.
 - Monitored and improved system performance, reducing downtime by 20% through proactive measures and optimizations.
 - Collaborated with cross-functional teams to design and implement cloud-based applications, enhancing user experience by 15%.
 - Provided technical support during critical operations, resolving 95% of incidents within SLA timelines.

Cloud Infrastructure Specialist

- ##### SkyHigh Solutions

08/2023 - 12/2024 New York, New York

 - Optimized cloud resources on GCP, leading to a 25% reduction in operational costs annually.
 - Managed hybrid cloud solutions integrating GCP and on-premises data centers, improving data processing capabilities by 40%.
 - Supported the development team to ensure seamless CI/CD practices using Jenkins, improving deployment time by 50%.
 - Developed documentation for cloud procedures, enhancing team onboarding and training efficiency by 20%.

Cloud Systems Administrator

- ##### CloudPro Solutions

04/2021 - 07/2023 Remote & San Diego, California

 - Administered GCP services including Compute Engine and Cloud Storage, enhancing scalability by 35%.
 - Automated routine cloud maintenance tasks using Python scripts, reducing manual errors by 30%.
 - Trained staff on cloud security protocols, leading to a 50% reduction in security incidents.
 - Collaborated with network administrators to optimize VPC configurations, improving connectivity speed by 10%.

SKILLS

- Google Cloud Platform Terraform Linux/Unix Networking
- Cloud Security Infrastructure as Code

EDUCATION

Bachelor's Degree in Computer Science

University of California, San Diego
01/2018 - 01/2021 San Diego, California

LANGUAGES

- English Native Spanish Advanced
