LeetCode

Professional Summary

Computer Science undergraduate (B.Tech CSE, 2027) with hands-on experience building AI applications using Python, LLMs, RAG, and AI Agents. Experienced in developing AI prototypes, integrating APIs, and evaluating AI systems. Strong foundation in software engineering, DSA, and databases, with a keen interest in exploring and applying emerging AI technologies.

Technical Skills

Programming Languages: Python, Java, JavaScript, TypeScript
Generative AI: Large Language Models (LLMs), Generative AI, RAG, AI Agents, Prompt Engineering, LangChain, HuggingFace Embeddings, Gemini API, Groq API, MCP
AI Evaluation & ML: Ragas, AI Evaluation, TensorFlow, CNNs, Computer Vision
AI Application Development: FastAPI, REST APIs, Streamlit, Pydantic, Instructor
Software Engineering: Object-Oriented Programming, Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks
Tools & Platforms: Git, GitHub, Linux, VS Code, Postman, Vercel
Databases: SQL, SQLite

Education

Amity University Rajasthan **Jaipur, Rajasthan**
Bachelor of Technology (B.Tech) – Computer Science and Engineering 2023 – 2027
CGPA: **8.91/10**

Experience

Web Developer Intern **June 2026 – July 2026**
City Scene Global Pvt. Ltd. Jaipur, Rajasthan

- Developed and enhanced full-stack application features using **React, JavaScript, and REST APIs** while collaborating with developers in an Agile development environment.
- Debugged production issues, implemented new features, and maintained existing modules through GitHub pull requests and code reviews.
- Performed software testing, issue tracking, and production debugging across multiple application modules.

Cyber Security Trainee **May 2025 – July 2025**
Learn & Build Jaipur, Rajasthan

- Completed hands-on training in **Linux, network security, vulnerability assessment, penetration testing, and secure software development practices**.
- Used **Kali Linux, Nmap, Wireshark, and Burp Suite** to analyze network traffic, investigate vulnerabilities, and understand common web application attack vectors.
- Strengthened understanding of secure coding, encryption fundamentals, system hardening, and security principles applicable to software systems.

Projects

RAG Study Assistant [GitHub](#)
Python, LangChain, Gemini, HuggingFace Embeddings, Streamlit

- Built a Retrieval-Augmented Generation (RAG) application using **LangChain and Gemini** for semantic querying of PDF documents.
- Implemented document parsing, intelligent text chunking, vector embeddings, retrieval, and prompt engineering to improve response quality and reduce hallucinations.
- Evaluated RAG performance using **Ragas** metrics including Faithfulness, Answer Relevancy, Context Precision, and Context Recall.

AI Resume Parser & Resume Evaluator [GitHub](#)
Python, Groq API, Pydantic, Instructor, Prompt Engineering

- Built an AI-powered application using Large Language Models to extract structured candidate information from PDF and DOCX resumes.
- Developed automated pipelines for extracting education, experience, technical skills, certifications, and projects from unstructured documents.
- Implemented LLM-based candidate evaluation to generate job-match scores, identify skill gaps, and provide AI-assisted hiring recommendations.

Certifications

- AWS Certified AI Practitioner** – Amazon Web Services (2026)
- Oracle Cloud Infrastructure Foundations Associate** – Oracle (2026)
- Full Stack Development** – Simplilearn (2026)

Achievements

- Awarded a **25% Merit-Based Academic Scholarship** at Amity University Rajasthan.
- Solved **100+ Data Structures and Algorithms problems** on LeetCode using Java.
- Participated in **IDEATHON 6.0 and LNMHACKS Hackathon**, collaborating on AI and software development solutions.
